Comments about the plant HD01	I think it is not somethings new in hardies.	a colour and a flower shape already existing, but a very nice floribondity.	This is a normal variety , with a good ratio of flowers to leaves, free flowers	Nice mexicana hybrid with compact leaves	Quite floriferous, nice pretty shiny happy color.	Color and leaves looks like similar to pinware and some other varieties.
Comments about the plant HD02	A whiter hardy.	an existing flower shape and colour. Many hybrids resemble it.	An excellent double white variety with very free flowers	Love the shape, the flower stalks seem strong compared with other odorata lilies	Nice floriferous compact pure white.	Very good shaped flower but flower qty lower than leaves
Comments about the plant HD03	I don't like it.	This waterlily already exists. Very common color.	Compared with the current international variety level, there is still room for improvement	Maybe not a strong grower for the first year	nice pointed petals, very weak in overall appearance.	Usual color flower and shape not good. Look like small size flower compared with leaves size.

Nome	Javier Egnér Tarillo	Julien Baussay	Jialong Wei	Zijun Li	Gabriel Timo	Rakibul Hasan
Comments about the plant HD04	Nothing out of the ordinary	Classic color and shape. Very close to what already exists.	The overall look is compact. Looks like a nice little hybrid	very cute and compact plant	pretty random hybrid, seems to be a strong grower, nice for large ponds.	Leaves and flowers color good. But the shape of flower not impressive.
Comments about the plant HD06	I like it.	beautiful flower shape, well carved. but the color is classic. A variety that can be interesting for the collection. it looks like a seedling of N. 'Nualaor'.	An nice double pink variety. Petals a kind buckled inward, Like little spoons	A decent hybrid but the deep pink color is ordinary	N/C	Very good shaped flower. Color also impressive.
Comments about the plant HD10	Nice hardy.	a color and shape of flowers and leaves that already exist. No interest in the collection.	Not bad overall. Leaf blade has wavy shape, relatively rare	Almost all flowers have burnt through the summer	Nothing really new, poor in development nor exciting.	Very impressive flower color and shape.

Nome	Javier Egnér Tarillo	Julien Baussay	Jialong Wei	Zijun Li	Gabriel Timo	Rakibul Hasan
Comments about the plant HD11	Similar to many.	Very beautiful flower shape. It can have a real interest in a collection even if there are already water lilies with this color and shape of flower.	A very nice hybrid. Flowers Bright, double,, very free. The flower has a good ratio to foliage. Occasionally irregular petals appear. The whole is impressive	really love it	Very outstanding Variety!	Flower shape & size impressive and color good.
Comments about the plant HD12	Nice hardy.	Very similar to pale pink varieties that already exist. But the flower shape is interesting.	The flowers are a rare combination of pale pink and white, fresh and elegant. Overall good	great combination of soft color and good shape	Nice soft colored flowers.	Flower shape good. Color ok.
Comments about the plant HD13	Very cute hardy.	Flowers a little small, existing color and shape. It reminds me of N. Pink Lemonade	The petals are broad and often wrinkled. Leaves mottled, there leaf vein will be a little light-colored lines. Less common	romantic color but the petals are less tidy	N/C	Flower Color and shape pretty good.

Nome	Andreas Protopapas	James Knock	Paula Bee	Rich Sacher	Keiji Kawai	Primlarp Wasuwat Chukiatman
Comments about the plant HD01	A yellow hybrid however it has no advantages over existing varieties. At some point a large number of flowers are produced however don't know how many eyes have been planted in the beginning of the season.	Simple but pleasing blooms, with nicely marked leaves.	Non sembra niente di particolare	Good flower color and shape, compact growth habit	Flower colors is elegant. This one make me remember "N.XPygmaea Helvora".	still love the peach tone but a bit less petals count. Stunning free flower too.
Comments about the plant HD02	A beautify double white and is also floriferous. The number of petals is huge and is very rare in the white category. It produces regularly shaped flowers globular in shape.	Nice full flower, but blooms appear a little small.	Anche se ricorda altre bianche, il fiore pieno è molto bello	Beautifully formed double flower, pure white.	Flower color, petal shapes, quantities seems to nice for tabs or garden pons.	amazing look - really love the kind of shape and petals count.
Comments about the plant HD03	A pinkish variety and looks similar to American star in shape. Low number of Petals. There are plenty of Pinks around, so it does not offer anything new.	Simple form with pleasing colouration.	Niente di particolare	Simple flower, good color, but not an unusual flower form.	This one makes me imagine old hybrids. Flower's color is good, but it is less than average level.	sweet one she will be good looking in a pool. In my opinion, if the leaf has a stunning pattern this will be better.

Nome	Andreas Protopapas	James Knock	Paula Bee	Rich Sacher	Keiji Kawai	Primlarp Wasuwat Chukiatman
Comments about the plant HD04	A star shaped pink/red however it does not offer anything new.	Nice compact habit.	niente di particolare	Nice flower color and shape, but many other varieties are similar.	Flowers' colors are good, but its shapes make me imagine old lilies.	flower seem to be medium size, love the shape. hope on the next generation breeder will get much more petals count.
Comments about the plant HD06	A double pink however there are plenty of these in the trade. It offers nothing new.	Nice flower form.	Bella forma e colore	Excellent double flower, perfect form, excellent uniform color to the flower.	Flowers' shape, volume, numbers of petals is so nice. This lily seems nowadays one.	I love this kind of shape also petals count. good looking one.
Comments about the plant HD10	A red variety however the colour fades out on the Petals that are closer to the Sepals. It does not offer anything new compared to other varieties that exist in the trade.	Simple form, nice deep flower.	Bel colore e forma. Poche foglie ma ben dimensionate.	Many other varieties look like this one.	I guess, this like blackish flower color is hard to show by hybridize result. But flowering time , its length is short.	at this moment, it will be better if much more darker color or pattern leaf.

Nome	Andreas Protopapas	James Knock	Paula Bee	Rich Sacher	Keiji Kawai	Primlarp Wasuwat Chukiatman
Comments about the plant HD11	A beautiful yellow/Orange globular flower with a large number of Petals. Also it is highly floriferous considering that it has started from a single rhizome. It also seems to change colours from day to day.	Nice flower form, free flowering with excellent sized blooms in comparison to leaves.	Bella pianta, sia colore che forma del fiore, sembra essere anche molto fiorifera.	Very good double flower with narrow petals. Nice color.	This like sunset color makes me imagine tropical lilies or this one's strain mexicana. I wish it had numbers flowers so much.	the petals count so stunning. Love so much with the color.
Comments about the plant HD12	A white double flower with a pinkish flush. Average number of flower production.	Nice flower form.	Bella la sfumatura rosa al centro del petalo.	Very good form for a double flower, color is not strong.	Flower color and shape, numbers of petal is so nice. Its worth while planting tubs or ponds.	sweet tone and also good-looking shape& petals count.
Comments about the plant HD13	A pinkish/white flower with a yellow flush in the center. Average number of Petals and flowers	Particularly nice leaves	Molto belle le foglie, fiore non particolarmente interessante	Nice hybrid, but not different from many others.	Flowers' shape, stems seems strong. This one has potential of making its size bigger, I think.	good color one, love the pattern of leafs.

Nome	Masato Morimoto	Antonio Nania	Ao Weerada	Severine Lyssens Dannenboom	Margaret Koogle	Jiří Řehoř
Comments about the plant HD01	It is difficult to find the difference from the conventional one	.	Everythings good but look similar with many old hybrid.	For me, waterlilies that take part in a contest should have unique features. It is always a bit tricky to base an opinion on pictures alone, but I will do my best ;-) I am a big fan of this type of flower colour, I also like the darker new leaves. So I would add this hybrid to my collection due to the combination of the flower and leaves colour. If you have a magic wand maybe you could add bigger flowers and a smaller leaf spread and it would be perfect ;-)	Love this lily:) Free blooming, love the color, variegated leaves	nice
Comments about the plant HD02	If the rhizome is of the Marliac type, it deserves a high rating.	.	So many petals count and good shape.	I am not a big fan of double flowers so when I saw the first picture I was not that impressed. But looking at all the pictures this one seems to be a very heavy bloomer and the shape of the mature flowers seems perfect to me. So, a very pleasant surprise this waterlily!	Pretty full blooming white	beautiful
Comments about the plant HD03	old school	.	Nice simple pink.	I am afraid this waterlily was not able to grow to it's full potential. It might have had a late start.	Pretty color pink, dainty bloom, not very many, uninteresting leaves, not a favorite	interesting

Nome	Masato Morimoto	Antonio Nania	Ao Weerada	Severine Lyssens Dannenboom	Margaret Koogle	Jiří Řehoř
Comments about the plant HD04	I can't find the novelty	.	So many leaves it should be good propagation.	I presume this waterlily is a smaller variety with a good combination of flower colour and shape. It seems to stop blooming earlier in the season...	Love the intense color pink contrasted with dark leaves, appears to be good bloomer	sympatic
Comments about the plant HD06	One of the pink Hardies with many petals in recent years	.	Great flower shape.	As I am not a big fan of the double flowers, I'm always a little bit hesitant to give my opinion. But I think this was has a nice shape as it doesn't have too many petals and it doesn't seem to fully open, which I think is a very nice trait. If it would be a little more compact in growth, it would be fabulous.	Love the blooms, leaves didn't do much for me	very nice
Comments about the plant HD10	90's style	.	Great colour.	It's so difficult to give an opinion on this one. When I saw the first picture, i was really impressed. The flower has a wonderful shape and colour, so I think there is definitely material to work with in the future. The leaves seem quite big in comparison with the flowers and it appears to be a	Loved the deep red color, leaves don't do much for me	nice

Nome	Masato Morimoto	Antonio Nania	Ao Weerada	Severine Lyssens Dannenboom	Margaret Koogle	Jiří Řehoř
Comments about the plant HD11	It is one of the new water lilies that match the times. It is very good	.	Somany petals and great shape.	I have always been drawn to this colour so for me that is a big plus. I love that the double flowers have long narrow petals, this makes them more elegant. The different shades in one plant is for me also a nice extra advantage. It seems to be a good bloomer and the leaves are not that much bigger than the flowers. So, yes, this one is a winner for	This is my favorite!! Love large blooms, blooms well, pretty color and leaves are flecked.	very nice
Comments about the plant HD12	Perhaps the petals are delicately colored, but it's hard to tell from the photo. I want to see the real thing. It must be beautiful.	.	Nice petals colour.	There are not that many hybrids with a double flower in this colour, so that's a good accomplishment. I presume this plant needs a lot of space to grow to it's full potential.	Love the blush color, doesn't seem to be a great bloomer and leaves aren't interesting	sympatic
Comments about the plant HD13	Reminds me of early Mike Hardies. I personally like it but not new	.	Very nice flower and leaves.	If I need to give a remark, it would be the abundance of leaves. But really, this is a very nice hybrid. Beautiful flower colour and shape. Nice leaf colours, so yes, well done!	Pretty color, interesting leaves, good bloomer	interesting

Nome	Pornchai Sukkasemsamranjit	Matthew Ross	Ildus Garipov	Ganesh Anandhakrishnan
Comments about the plant HD01	So many leaves more than flower.	The peach and pink etched lower petals are a nice foil to the darker pattern on the emerging growth in the heat of the summer. The lack of a floral explosion and limited number of blooms in relation to the overall plethora of vegetation needs a bit more balance.	I was impressed by the abundant flowering and two-tone flowers.	Nice one
Comments about the plant HD02	Very nice sharp.	An abundance of double blooms with what appears to be a very clean white coloration. I am impressed by the how much the red petioles of the pads accent the plant and the numerous blossoms.	There are a lot of petals, the flower is symmetrical, abundant flowering.	Similar to few existing cultivars
Comments about the plant HD03	Normal flower.	Absolutely electrifying coloration. Might be even a bit too bright for universal approval but I would love to see a more abundant floral display. A shame there weren't more buds and blossoms earlier in the season as the show appeared to get better later into August.	There are many similar water lilies, the leaves are very large.	Leaves are beautiful than flower.

Nome	Pornchai Sukkasemsamranjit	Matthew Ross	Ildus Garipov	Ganesh Anandhakrishnan
Comments about the plant HD04	Normal pink.	Appears to be a great early to mid-summer bloomer with some vigorous growth and abundant blooms in June through early July. Would love to see more interest in the foliage but a sharp looking early summer to mid/late summer bloomer.	The waterlily blooms very profusely all season. There are a lot of leaves.	Beautiful
Comments about the plant HD06	Nice sharp good free flowers.	A vibrant pink blossom with a heavy petal count with a variable number of blooms throughout the summer really peaking in the mid-summer heat. I like the color of the bloom and would like to see it echo a bit more with a dynamism in the leaf coloration.	There are many petals on the flower and they are arranged symmetrically, blooms profusely.	Beautiful leaves with perfect flower in shape
Comments about the plant HD10	Good red flower but normal sharp.	Great photo on July 29th really like the soft edge of color on the leaf. Overall wish there was a bit larger flower and a healthier and consistent succession of foliage to compliment it.	This waterlily does not surprise me in any way, it looks like classic waterlilies.	Less impressive

Nome	Pornchai Sukkasemsamranjit	Matthew Ross	Ildus Garipov	Ganesh Anandhakrishnan
Comments about the plant HD11	Have uniqueness. Love love.	The early seasonal foliage has a nice touch of interest before the blooms really take center stage. A nice soft ombre of pinky peach outer petals and pronounced yellow center creates a nice effect. The late season blooms appear to be the best in October shots but saw a bit of a decline in overall number of blooms later in the season after peaking in	The flower has a lot of petals, they are all symmetrically arranged, the color is bright orange-peach. Blooms profusely. Very impressed.	Amazing
Comments about the plant HD12	Good sharp, nice flowers.	The soft creamy touch of pink on the outer petals and size of the actual bloom are appealing. Would like to see a bit more blossoms before late mid-August when it appeared to have peaked.	The flower has a lot of petals, they are all symmetrically arranged, the color is pale pink with a transition to white, I am impressed.	Flower is so unique
Comments about the plant HD13	Nice leaves and color.	Fantastic foliage throughout the growing season. A nicely patterned early emergence and good darker undertones. The flower is quite nice and I am curious of the undulation towards the end of the petals was consistent throughout the year? Would love to see a bit higher petal count or more reflexed presentation of the outer petals to really exemplify	An interesting combination of yellow and pink on the petals of the flower. Goblet-shaped flowers and attractive leaves.	Good one
