Comments about the plant Lo01	I like this shape.	Very double tropical lotus hybrid, large, petals unique style	inner petals are less tidy	N/C	I find the double flowers too heavy and disgraceful on the lotus. I prefer a remarkable color on a large single flower.
Comments about the plant Lo02	I like a star form.	The flowers are like the hands of a dancing beauty, full of change. Very free flowers	very unique tulip form for lotus	N/C	An interesting flower shape on a pure white, it seems very floriferous. It seems to have good qualities.
Comments about the plant Lo03	Nice yellow lotus	The yellow of the flowers is bright. The outermost petals droop slightly to form a multi-layered flower	perfect shape and color	N/C	It seems very flowery, the color is a bit bland. The yellow ones are not the ones that interest the buyers. But it is necessary, and if this one blooms a lot, it is a great quality.
Comments about the plant Lo05	I like a shape and color.	A classic type of lotus	cute but flowers last too short	N/C	I am not a lotus specialist enough to know if there is already a nearby Lotus. But I really like the shape of the flower and the colors. Very nice
Comments about the plant Lo06	one more lotus.	A classic type of lotus	ordinary	N/C	Far too close to what already exists, it is quite ordinary in a Lotus collection.

Comments about the plant Lo01	Flower color and shape very impressive.	Very full flower.	Bella la sfumatura del rosa	Flower form is not attractive to me.
Comments about the plant Lo02	Flower shape very unusual.	Excellent bloomer	Particolare con i petali a punta. Molto interessante	Flower shape is weak, flowers are small.
Comments about the plant Lo03	Flower color and shape very impressive.	Nice richly coloured yellow.	Bello il colore e la forma del fiore	Good yellow color on a double flower
Comments about the plant Lo05	Flower color and shape impressive.	Extremely elegant	Carina la sfumatura rosa	Flower looks like other hybrids.
Comments about the plant Lo06	Flower color impressive.	Large blooms, nice rich colour	Non colpisce particolarmente ma la forma e colore sono belli	Good dark pink color on a typical lotus flower form.

Comments about the plant Lo01	I felt that this ones semi-double shape is nice.	Very stunning flower shape and petals count.	It's a gorgeous flower.	.
Comments about the plant Lo02	This shape and white color is nice. This one is dwarf and makes many flowers so that easy to grow in a small tab. So nice!	special looking petal shape but hope she could be more petal.	looks like blooming a lot	.
Comments about the plant Lo03	This one's yellow color and multi-petaled shape is so beautiful! The newest picture show me that this one can produce leaves and flowers much more by using fertilizers.	nice tone and perfect shape.	It's gorgeous and nice to bloom a lot	.
Comments about the plant Lo05	Flowers colors and shapes is so nice , beautiful. I wish, it produced flowers so many.	love the pink tip.	Pink tips have been popular in Japan for a long time	.
Comments about the plant Lo06	I guess that this one is a middle sized lotus. This one needs larger tab, much more fertilizers.	classic one and I love the petal smooth pink tone too.	It looks It's simple pink	.

Comments about the plant Lo01	Amazing flower petals.	Big flowers, big leaves, what's not to love.	Pretty double pink bloom	too full flower	-
Comments about the plant Lo02	Cute!	What a cutie. A dancing shape, bright colour and a lot of flowers. The flowers seem to stand above the leaves at all times, so that is definitely an extra advantage.	Interesting white with pointed leaf	nice	Have uniqueness sharp flower.
Comments about the plant Lo03	Just perfect!	Yes, light yellow that is always a winner. I think this lotus would give off a feeling of warmth in any pond. The flowers stand perfectly above the leaves.	Pretty double yellow:)	very nice	Good deep yellow and good sharp.
Comments about the plant Lo05	Nice multicolour petals.	This lotus flower seems to have the perfect shape but it appears to be a very moderate bloomer.	My favorite, elegant and graceful	fantastic	-
Comments about the plant Lo06	Huge flowers.	Flower colour and shape seems nice enough. The red leaves are always a plus. Unfortunately it does not seem to be a very good bloomer.	Pretty deep pink	beautifull colour	-

Comments about the plant Lo01	The recurved inner petals give a unique almost peony-like effect and interesting appearance very unique in its presentation. Very cool plant!	A lot of petals, pleasant color, abundant flowering.	Good cultivar.
Comments about the plant Lo02	Intriguing upright cupped blossom creates instant movement and drama and something novel. Appears to have been a resilient bloomer throughout the growing season too.	The plant is compact, blooms profusely. The flowers are deformed.	Very unique shaped single petal lotus
Comments about the plant Lo03	Love the soft yellow and full appearance of the bloom and its orderly manner! Really intrigues by this plant and hope to see it continue to present well and hopefully in my garden center and someday even my garden, love it!	There are a lot of petals on the flower, bright, symmetrical. I am very impressed.	Amazing one in yellow.
Comments about the plant Lo05	Nice pink etching on the petals, there was not a strong selection of shots later in the season to compare. Has some fun potential.	White petals with a pink tip look very impressive. The lotus blooms little and short.	Beautiful
Comments about the plant Lo06	With a sense of simplicity and calm, the vibrant pink petals around the perfectly golden receptacle are a nice combination. Would like to see a broader view of the foliage which appears to be just below or level with the flower.	Pleasant color and long flowering.	Similar to many exist cultivar
